Course information

Prerequisites

No

This course is assigned to the profile «Supply Chain & Operations Management», but can also be taken without selecting a specialisation.

Learning objectives

Students

- Understand the role of Integrated Business Planning with a focus on Sales and Operations Planning
- Learn how to solve specific planning problems (e.g., demand planning, purchasing and production planning, ressource planning, etc.) with different tools and methodologies
- Understand how to align sales and operations planning to reach operational and financial targets
- Know how to measure the performance of supply chain and operations
- Learn and apply SAP IBP tool to solve specific planning problems
- **You receive a certificate for Westernacher SAP IBP at the end of the course**

Content

At the moment there is almost no day without news about delivery bottlenecks or delays of products. This is a challenge for the Operation Teams in companies. Thus it is of major importance to have Sales and Operations under control and being resilient towards incidents. Therefore, Integrated Business Planning (IBP) or also called Sales and Operations Planning (S&OP)» comes into the game, a key discipline in any manufacturing company. IBP is a business process that helps companies keep demand and supply in balance. IBP is highly cross-functional, involving General Management, Sales, Operations, Finance and Product Development.

In this course on Integrated Business Planning (IBP), students gain hands-on experience with key methods and tools used to align demand, supply, and financial planning. Supported by the SAP Integrated Business Planning (SAP IBP) tool, participants work through an interactive simulation based on a real-world case.

They take on cross-functional roles—such as Marketing, Finance, and Operations—to navigate the full S&OP cycle. Students analyze demand trends, make production and procurement decisions, and determine where and when to produce in order to meet strategic targets like delivery performance and cost efficiency.

The simulation mirrors the dynamic environment of real companies, emphasizing S&OP as a critical core process and a key competitive advantage for manufacturing organizations that manage it well. With guidance and modern digital tools, students learn to make informed, data-driven decisions and experience the importance of cross-functional alignment in achieving optimal business outcomes.

Structure and indications of the learning and teaching design

- This course counts 3 credits. Accordingly, the total workload for students is 90 hours. This includes self-study, campus time and all examinations.
- The structure of the contact study is planned as follows: 9 hours of lectures, 12 hours of group work (case) and tool application, 3 hours of guest lectures.
- The structure of the self-study is intended as follows: 18 hours of preparation/exercise time for the lectures and 48 hours for the examination
- The course is structured as a block course during the break on three consecutive days.
- The course is conducted in presence in St. Gallen

The students will work in groups on a specific case (Yachts). Within the case the students will learn how to use SAP IBP Tool to solve the tasks. The students will also receive a Westernacher SAP IBP Certificate. The course has a seminar character. It contains a group work (50%) and a written exam (50%).

Day 1: Demand Planning
1. Introduction
2. Integrated Business Planning and the monthly S&OP cycle
3. Sales & Demand Planning
4. Group Work and role play: Preparation of demand plan and 1st S&OP Meeting (incl. SAP IBP Tool Training)

(Result day 1: Presentation of Demand Plan)

Day 2: Supply Planning
1. Supply (Capacity) Planning
2. Production Planning
3. SAP IBP Training and Coaching
4. Group Work and role play: Preparation of supply plan incl. 2nd S&OP Meeting (incl. SAP IBP Tool Training)

(Result day 2: Presentation of Supply Plan)

Day 3: Optimal Alignment of Demand, Supply and Finance
1. Lot size and scheduling
2. Optimization
3. Creating the financial link
4. Group Work and role play: Preparation of an optimized plan incl. 3rd S&OP Meeting (incl. SAP IBP Tool Training)

(Result day 3: Presentation of Optimized Plan)

Additional information

Examination information

Examination sub part/s

1. Examination sub part (1/2)

Examination modalities

Examination type	Presentation
Responsible for organisation	decentral
Examination form	Oral examination
Examination mode	Analog
Time of examination	Term time
Examination execution	Asynchronous
Examination location	On Campus
Grading type	Group work group grade
Weighting	50%
Duration	--

Languages

Question language: English
Answer language: English

Remark

--

Examination-aid rule

Free aids provision

Basically, students are free to choose aids. Any restrictions are defined by the faculty members in charge of the examination under supplementary aids.

Supplementary aids

-

2. Examination sub part (2/2)

Examination modalities

Examination type	Written examination
Responsible for organisation	decentral
Examination form	Written exam
Examination mode	Analog
Time of examination	Term time
Examination execution	Synchronous
Examination location	On Campus
Grading type	Individual work individual grade
Weighting	50%
Duration	90 mins.

Languages

Question language: English
Answer language: English

Remark

--

Examination-aid rule

Closed Book

The use of aids is prohibited as a matter of principle, with the exception of pocket calculator models of the Texas Instruments TI-30 series and, in case of non-language exams, bilingual dictionaries without any handwritten notes. Any other aids that are admissible must be explicitly listed by faculty members in the paragraph entitled “Supplementary aids” of the course and examination fact sheet; this list is exhaustive.

Procuring any aids, as well as ensuring their working order, is the exclusive responsibility of students.

Supplementary aids

Calculator, see above general regulations on teaching aids. The lecturer will provide a collection of formulas. This will be attached to the exam

Please note

Please note that only this fact sheet and the examination schedule published at the time of bidding are binding and takes precedence over other information, such as information on StudyNet (Canvas), on lecturers' websites and information in lectures etc.
Any references and links to third-party content within the fact sheet are only of a supplementary, informative nature and lie outside the area of responsibility of the University of St.Gallen.

Documents and materials are only relevant for central examinations if they are available by the end of the lecture period (CW21) at the latest. In the case of centrally organised mid-term examinations, the documents and materials up to CW 13 (Monday, 23rd March 2026) are relevant for testing.

Binding nature of the fact sheets:

- Course information as well as examination date (organised centrally/decentrally) and form of examination: from bidding start in CW 04 (Thursday, 22nd January 2026);
- Examination information (supplementary aids, examination contents, examination literature) for decentralised examinations: in CW 12 (Monday, 16 March 2026);
- Examination information (supplementary aids, examination contents, examination literature) for centrally organised mid-term examinations: in CW 14 (Monday, 30 March 2026);
- Examination information (regulations on aids, examination contents, examination literature) for centrally organised examinations: two weeks before ending with de-registration period in CW 15 (Monday, 06 April 2026).
